PROFESSIONAL SUMMARY

IT and Networking professional seeking a role in IT support, networking or cybersecurity. Currently working as an Electrician and Site Document Support professional in Saudi Arabia with experience in technical documentation, reporting and site coordination. Developing practical networking skills through Cisco Packet Tracer and GNS3 labs involving VLANs, OSPF, GRE tunnels, DHCP Snooping, STP, HSRP and network troubleshooting. Familiar with Python programming and automation. Eager to apply technical knowledge and problem-solving skills to support reliable and secure IT operations while continuing to grow professionally.

SKILLS

Document Control & Operations: Knowledge of Document Management Systems, EDMS, Aconex, Technical Documentation, Engineering Drawings, Transmittals, Submittals, Version Control, Filing Systems, Site Coordination, SABER Platform, SASO Compliance and Microsoft Office Suite.
Networking & IT: Hands-on networking lab experience using Cisco Packet Tracer and GNS3 involving VLAN configuration, OSPF routing, GRE tunnels, DHCP Snooping, STP, HSRP, and network troubleshooting.
Programming & Web: Basic knowledge of HTML, JavaScript, and Python with experience developing and deploying responsive portfolio websites using GitHub Pages.
AI & Digital Tools: Experienced with Prompt Engineering, LLMs, AI-assisted research, and AI productivity tools for documentation, workflow support, and technical learning. Integrating
Technical Support: Proficient in Windows and Linux system troubleshooting with working knowledge of Active Directory, complemented by practical experience in electrical maintenance, preventive maintenance, troubleshooting, technical reporting.

EDUCATION

Diploma in Business Administration | Alison | 2026
Bachelor of Social Science (BSS) — Pass Course| National University, Bangladesh | 2025
Higher Secondary Certificate (HSC) in Science | Chowmuhani Government College, Bangladesh | 2022

PROJECTS

Enterprise Network Security Design | *Cisco Packet Tracer* **|** https://github.com/pritomroy10/enterprise-network-security-design
- Designed a secure enterprise network with multiple departments utilising a collapsed core topology, layer 3 switching and inter-VLAN routing.
- Configured and implemented a dynamic routing protocol (OSPF) and Zero Trust security model using extended ACLs to lock down HR/Finance departments to only be able to access the internet and prevent IT from accessing sensitive server VLANs.
- Secured network edge by integrating Cisco ASA Firewall with NAT and security zones. Fully tested security by ensuring full connectivity.

Network Vulnerability Assessment | *Kali Linux, Nmap, Metasploit* **|** https://github.com/pritomroy10/network-vulnerability-assessment
- Carried out a targeted vulnerability assessment to find and validate 12 individual findings within the Metasploitable target that had been deployed on a stand alone VMware lab.
- Unauthenticated Root Access was gained by exploiting 4 Critical RCE vulnerabilities (vsftpd backdoor, Samba CVE-2007-2447, Tomcat default credentials, and raw bind shell).
- Created a professional report for the client that included: Proof of concept, CVSS Score and remediation recommendations.

Portfolio Website | *HTML, Python, GitHub Pages* **|** pritomroy10.github.io
- Designed and built a responsive portfolio website using HTML, GitHub Pages to display my Cybersecurity and Networking labs, network diagrams and technical documentation.

WORK EXPERIENCE

Document Controller | M.H Medicine Shop, Bangladesh | February 2022 – August 2025
- Managed digital and physical filing systems for invoices, purchase records, and supplier documentation to ensure smooth daily operations.
- Prepared daily/weekly operational reports, updated inventory records, and assisted management with data entry and administrative tasks.
- Coordinated document handling between suppliers, staff, and management, while organizing archiving systems for efficient retrieval.

Cybersecurity & IT Support | SSL Wireless | Remote | May 2025 – November 2025
- Monitored network traffic and investigated potential security threats using Wireshark and Nmap.
- Assisted with network security operations, including firewall rule management, VPN configuration, system updates, and vulnerability assessments.
- Troubleshot hardware, software, and Windows/Linux operating system issues to ensure reliable IT operations; documented technical incidents and security findings.

Electrician and Site Document Support | Saudi Construction Company, Saudi Arabia | September 2025 – Present
- Perform electrical installation, preventive maintenance, and troubleshooting for construction site operations.
- Interpret electrical drawings and technical diagrams to support site execution and engineering activities.
- Maintain maintenance logs, installation records, and handover documentation; coordinate with engineers to support material and document approval processes.
